HG098 USER MANUAL

hygger reptile humidifier

The hygger reptile humidifier is designed specifically for a wide variety of reptiles and amphibians, such as turtles, tortoises, bearded dragons, frogs, geckos, snakes, iguanas, lizards, chameleons, water dragons, toads, hermit crabs, and more

! Attention:

1. Please read the instructions carefully. Use and follow the instructions strictly.
2. The water tank, sink, and atomizer should be cleaned every week, and the power plug must be unplugged before cleaning.
3. External cleaning of humidifier: Use a clean soft damp cloth below 40°C to wipe the outer surface clean.
4. Do not use hard objects during cleaning to avoid damaging the components.
5. Do not use chemical detergents for cleaning.
6. Please frequently replace the water and keep the inside of the humidifier clean
7. When not in use for a long time, please keep the inside of the humidifier dry.

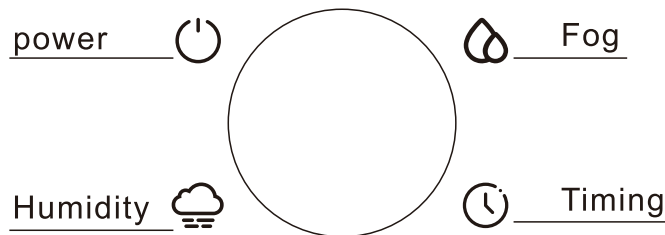

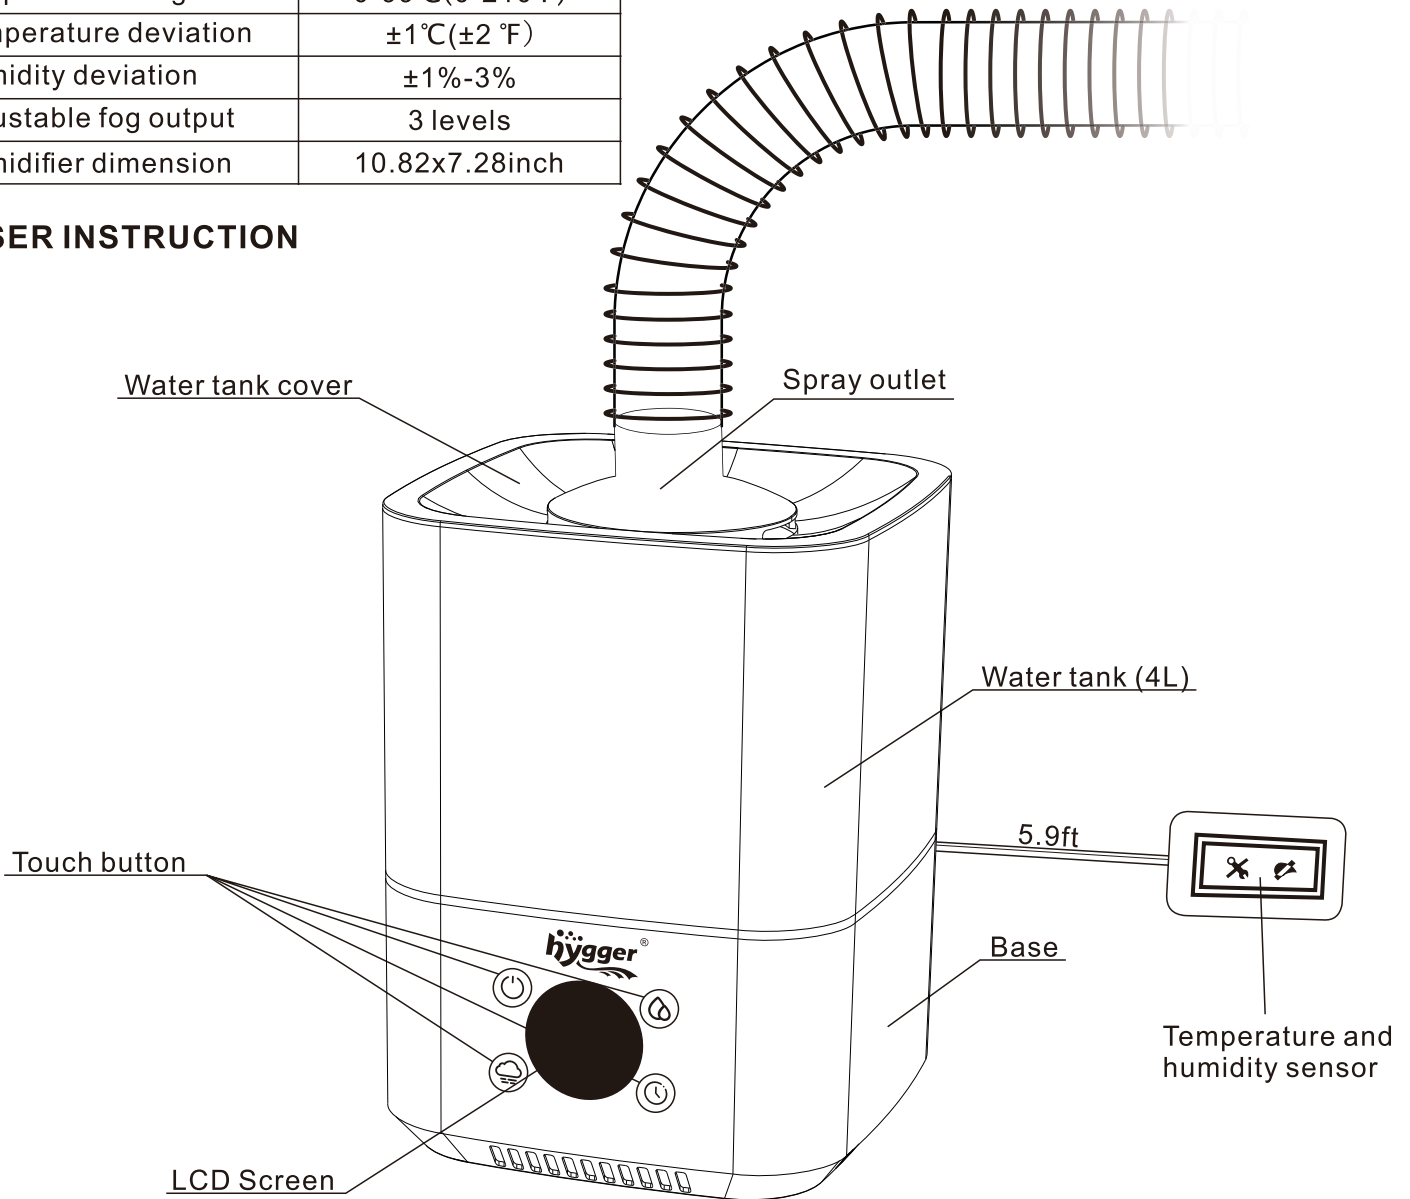

1. PRODUCT PARAMETERS

Model No:	HG098
Output voltage	AC 110-120V/60Hz
Cord length	3.94ft
Humidity Range	45%-90%
Tank capacity	2.6-4.0L
Temperature range	0-99°C(0-210°F)
Temperature deviation	±1°C(±2 °F)
Humidity deviation	±1%-3%
Adjustable fog output	3 levels
Humidifier dimension	10.82x7.28inch

2. PACKAGE INCLUDES

- 2× Suction cups
- 1× 6.5ft flexible adjustable tube
- 1× Temperature and humidity sensor
- 1× Spare atomizing chip
- 1× User manual
- 1× Perforated sucker

3. USER INSTRUCTION

Installation instruction

Place the machine on a horizontal desktop, remove the water tank cover, and fill it with an appropriate amount of clean tap water or distilled water (the power plug must be unplugged when filling the water). Place the water tank smoothly on the machine base, cover the water tank cover, and insert the machine power plug into the socket. Before switching on the power supply, make sure that the working voltage of the machine matches the operating voltage.

After turning on the power, lightly touch the power button, and the LED screen will light up.

Then, lightly touch the power button again to stop the humidifier from working and enter standby mode

When the water level in the machine's sink is too low, the machine will automatically cut off the power and stop working, please turn off the power switch first, then unplug the power supply before adding water to the water tank.

Note: Please put the temperature and humidity sensor in the tank in order to acquire the correct value.

Button instruction

Power button: After switching on the power, gently touch the power button, the LCD screen lights up and the machine begins to work.

Humidity key: Press this key for the first time to enter the humidity function, and the word "humidity" will flash on the LCD screen; the default humidity is 45%, then press the increment of 5% to 90%, and press the humidity key to select the required humidity. The value will flash several times and then display the current temperature and humidity and start working. When the ambient humidity is lower than the set humidity value by 2% ~ 3%, it will automatically start working. It should be noted that when the ambient temperature is higher than the set humidity When the value is set, the atomizer will not work and will not start working until the ambient humidity drops below the set humidity value.

Fog key: There are three fog levels: low fog, medium fog and high fog. Product startup default to the most fog work.

Timing key: The function of scheduling scheduled shutdown and entering standby state. It can automatically shut down and enter standby mode at 1 hour, 2 hours, 4 hours, and 8 hours. After setting the desired time, the set time will be displayed on the screen.

Sleeping function: When the product starts up, press and hold the timer button for 3 seconds to activate the sleep function. It will automatically switch off the display screen and keep the original gear working.

4.Product cleaning

Before cleaning, always switch off and unplug the power supply.

Pour the scale remover into the machine base, then add warm water at around 60 °C to dissolve all the scale remover, and leave to soak for 5-10 minutes.

Then use a cleaning brush to wash the surface of the transducer until the scale is removed.

Simultaneously clean the base and rinse the surface of the base and transducer with clean water.

5.Operational principle

Desktop humidifiers use the principle of ultrasonic oscillation, which generates 1.7 million high-frequency oscillations per second, and atomises the water into ultrafine particles of 1-5 microns. Then, the water mist is diffused into the air through the pneumatic device to achieve the purpose of uniformly humidifying the air.

6.Kind reminder

Regarding the accumulation of water on the base:

The humidifier uses vibration from an ultrasonic atomizer to disperse liquid water into mist. The water tank is only a transitional water storage tool, and all humidifiers base water tanks will accumulate water.

Please rest assured to use it

Regarding the adjustment of fog volume:

If there is water around the machine during use, it indicates excessive humidity in the room. Please adjust the amount of fog appropriately.

7.Safety instructions

1.Please do not pull the plug with wet hands to avoid the risk of electric shock.

2.Except for replacing the atomizer sheet, please do not disassemble, repair, or modify this product without authorization.

3.When turning on the machine, do not touch the atomizer with your hands, as it may cause pain.

4.The power cord must not be scratched, damaged or knotted, nor squeezed, clamped or processed, as this may result in electric shock, short circuit, or fire.

5.Do not replace the power cord without authorization. If there are any abnormalities, please immediately unplug it and contact the manufacturer or after-sales customer service.

6. If the power cord is damaged, to avoid danger, it must be replaced by professionals from the manufacturer, its maintenance department, or a similar department.
7. Do not separate the water tank from the base during work, and do not touch the water and components in the base.
8. This machine is for indoor use only.
9. During the thunderstorms or when not in use for a long time, please unplug the power supply.
10. Do not flip the appliance while it is powered on or with water inside to avoid burning internal electronic components.
11. Please keep this product out of reach of children and do not allow them to use or operate it to avoid accidents.
Unplug the power plug when filling with water and cleaning.

8. Troubleshooting

If your humidifier does not work properly, you can check yourself according to the table below before requesting repair service:

Fault phenomenon	Cause analysis	Exclusion method
The status indicator does not light up	Power not connected, switch not on	Turn on the power and switch
Power on, display flashes, red light does not light up	The water level is too low	Fill the water tank to the appropriate level
Normal startup, no spray	1. Scaling on the atomizing plate. 2. Dirty or long storage time of water. 3. The water level was turned down to the lowest gear.	1. Clean the atomizer and add a small amount of hot water to the water tank 2. Replace it with clean water 3. Set to the desired spray gear
Abnormal sound	1. The water level in the water tank is too low 2. Resonate with the placed countertop	1. Add the appropriate level of water to the tank 2. Place on a sturdy and stable surface
There is water in the sink but it always shows a water shortage condition	Switch sensing, float stuck	Pull the float to move up and down smoothly
The indicator light is blue and there is no fog, or the water in the water tank vibrates when you lift the tank, but there is not much fog.	Maybe there is something wrong with the atomizer plate.	Replace the atomizer plate.

9. DISPOSAL

Do not dispose this product as unsorted municipal waste. Collection of such waste separately for special treatment is necessary. This product must not be disposed together with the domestic waste. This product has to be disposed at an authorized place for recycling of electrical and electronic appliances. By collecting and recycling waste, you help save natural resources, and make sure the product is disposed in an environmentally friendly and healthy way.

10. ONE YEAR LIMITED WARRANTY

This product MUST be purchased from an authorized hygger reseller. Visit our website for a list of unauthorized resellers. hygger warrants this product against defects in materials and workmanship for ONE(1) YEAR from the date of the original retail purchase and is none-transferable.

Warranty on all products, including aquariums. But it is limited to the replacement of the products and does not cover fish loss, personal injury, property loss or direct, incidental or consequential damage caused by using this product.

Note: hygger One-year Limited Warranty does not cover damage caused by the followings: improper installation, saltwater corrosion, electrical surges or modifications. Additionally, products that have been refunded are also not covered under the warranty.

If you discover a defect, please contact hygger, who will, at it's option, repair or replace the product at no charge, provided that you return it during the warranty period. A copy of the bill of sale is required as a proof of the original purchase date in the event of the product needing repairs within the warranty period. hygger

does not warrant any products that aren't hygger's.

This warranty does not apply if the product has been damaged by accident, abuse, misuse or misapplication, or modified without the written permission of hygger.

Thank you for choosing hygger.

If you are satisfied with the the hygger reptile humidifier, please leave positive feedback for our product, in order to let more customers enjoy it. Thanks again!
